---

Healthcare professionals and international students often struggle to find the right English proficiency test and guidance.

We break down the differences, advantages, and ideal scenarios for each test so you can make the right choice for your goals, whether it's registration with a foreign medical council or admission into an international university.

The OET is healthcare-specific, perfect for nurses and doctors. PTE is for academic and visa purposes.

Many students feel confused, but choosing the right one can change their future
